

M-Gift Cards are redeemed in the same way as Plastic Gift Cards.

How to Process M-Gift Cards

- 1** **The customer will show you** a text message on his/her cell phone. The message contains your store name and a gift card number (15 or 16 digits).
- 2** **Ring up the sale** in exactly the same way as you would a plastic gift card. *(ie. Amount, Clerk ID, etc.)*
- 3** **Key in the gift card number** shown on the cell phone screen when prompted to swipe the card or enter the card number.
- 4** **A standard receipt will print** showing the remaining balance on the M-Gift Card.

Where did this text message come from?

An M-gift card is a virtual gift card that your customers can instantly send to anyone by text message.

Here's how it works: A customer places an order for an M-Gift Card on your online gift card store. The M-Gift Card is instantly sent to the recipient's cell phone. The recipient brings his/her cell phone to your store and presents it to the cashier.
